

CONIPUR PRO CLAY IPC

Clay Sand made of Clay Brick Fragments with an Additive for Indoor Tennis Courts

Product description

CONIPUR PRO CLAY IPC is clay sand mixed with an additive.

The additive reduces the development of dust and keeps the playing area moist. Depending on the humidity of the air it will be necessary from time to time to re-apply

CONIPUR PRO CLAY IPC or to moisten the sand with CONIPUR PRO CLAY absorber.

Fields of application

CONIPUR PRO CLAY IPC is used on top of the base coat made of CONIPUR PRO CLAY chippings with our CONIPUR PRO CLAY binder when installing tennis courts inside.

Technical data

particle size	mm	approx. 0-2
density of application	kg/m ³	approx. 1'680
consumption	kg/m ²	approx. 4
<i>Above figures are guide values and must not be used as a base for specifications!</i>		

Pack size

CONIPUR PRO CLAY IPC is delivered in bigbags of 835kg.

Colour

red

Storage

CONIPUR PRO CLAY IPC must be stored under dry conditions and sheltered from weather.

Safety precautions

CONIPUR PRO CLAY IPC is after application non-hazardous
