APPLICATION SERVICE

SiteForce

DELIVER LARGE AND DEMANDING PROJECTS WITH CONFIDENCE.

CONICA SiteForce is a temporary, project-based installation and consulting service for installation companies. CONICA provides additional installation capacity, equipment and technical support. This allows demanding sports flooring projects to be completed reliably and to a high standard, even within tight time windows.

More Capacity
Take on additional projects without expanding your own teams.

Tight Time Windows
Complete demanding surfaces on schedule, even within tight time windows.

Suitable Equipment
Suitable equipment and experienced teams help ensure productivity and on-time delivery.

Specialist Experience
Experienced and well-coordinated teams increase installation reliability on site.

New Markets
Expand into new regions, even when your own team size would otherwise be limiting.

Lower Risk
Reduce risks related to schedules, weather, logistics and concurrent events.

Claims Handling
CONICA takes care of material and installation from a single source, enabling immediate action when a claim arises.

SUPPORT, NOT COMPETITION.

Our Application Services SiteForce and Supervisor do not replace the local installer. They provide targeted support where needed. SiteForce takes on agreed installation work and is responsible for its execution. Supervisor provides technical guidance, safeguards quality and builds expertise. The customer relationship remains with the local installer.

Supervisor

Supervisor

ON-SITE ENABLEMENT FOR DEMANDING PROJECTS.

The Supervisor Service is a temporary, project-based on-site enablement and technical guidance service. An experienced CONICA expert supports new or inexperienced teams directly on site, shares technical expertise and monitors quality without carrying out the installation work.

Expertise without Fixed Costs
Expertise directly on site without the need to build an in-house training structure.

Team Enablement
The crew learns to complete demanding projects independently and efficiently.

New Market Access
New projects become possible even when the crew still lacks experience.

Technical Guidance
An experienced CONICA expert guides the crew and oversees the installation.

Reduced Reputational Risk
Early error prevention reduces rework, claims and delays.

Clear End Point
The Supervisor supports the crew until it can work independently and gradually steps back as experience grows. The knowledge remains within the team.
